

03 October 2025

Dear families,

**Year 11 Preparation for November Mock exams
Computer Science GCSE Revision Events**

In preparation for the computer science mock exams in November there are some online revision sessions available through the Isaac Computer Science website that would be a great addition to the computer science student's revision programme.

These sessions are after school, and students sign up to the sessions through the website, there is limited availability. All students have a login for the website to be able to do this.

Isaac Computer Science Exam Booster events – book through the website. Go to the Events section, select upcoming events, the types of sessions are boosters and the stage is GCSE.

<https://isaaccomputerscience.org/>

Here are the details of the sessions, these are all topics the students have studied and therefore likely to be assessed in the November mock exams and the exams in the Summer.

- Programming – Selection – Tuesday 7 October 4:30 - 6:00pm
- Programming – Loops – Wednesday 15 October 4:30 - 6:00pm
- Network fundamentals – Monday 20 October 4:30 – 6:00pm
- Network security – Tuesday 28 October 4:30-6:00pm
- Networks: Communications and connections Wednesday 5 November 4:30-6:00pm

If students don't have access to a computer at home to be able to do these sessions during term time, then please get in touch via the email below and I can support with supervising the students during these sessions.

If students have been invited to English, Maths or Science intervention then they need to prioritise those sessions.

Yours sincerely

Mrs J Orton
Senior Vice Principal
